

- Customizable post length: 2.1 to 4.0 m

Professional Agrisolar Structures – Designed for Performance and Flexibility

- Compatible with a wide range of photovoltaic modules
- Enables dual use of agricultural land for energy production
- Customizable design and aesthetics to meet individual client requirements
- Engineered to withstand climate-specific loads based on project location
- Modular structure allowing for future expansion and modifications
- Optimized column spacing and clearance to ensure unobstructed passage of agricultural machinery, including combines

Durability and Long-Term Protection

- Corrosion protection: zinc coating and/or hot-dip galvanization
- 1-year warranty on components with Z275 zinc coating
- 2-year warranty on hot-dip galvanized components
- 25-year warranty on the protective coating
- 25-year structural warranty
